PROFESSIONAL SUMMARY

Senior Product Owner with 10+ years in product management, owning product definition and release delivery end to end for enterprise platforms, consumer mobile applications and telecom systems at T-Mobile, Brightspeed and McKinsey & Company. Translate business needs into a prioritized backlog, work with development teams to get features built and accepted against a clear Definition of Done, and keep globally distributed stakeholders aligned. Completing the IIT Madras Professional Certificate in AI-Powered Product Design and Management, applying AI-driven discovery and prioritization techniques to live product work.

CORE SKILLS

Product Ownership: Product Backlog Management, Requirements Clarification, Epics, User Stories, BDD Acceptance Criteria, Definition of Done, Sprint Work Acceptance, Change Request Analysis, Roadmaps, Feature Prioritization (RICE, MoSCoW), OKRs

AI & Emerging Technology: AI Product Management, AI-Powered Product Discovery and Prioritization, Prompt Engineering, LLM Applications, AI Strategy

Agile Delivery: Agile, Scrum, Sprint Planning, Backlog Refinement, Sprint Reviews, Retrospectives, Cross-Team Dependency Management, Distributed Onshore/Offshore Teams

Release, Risk & Compliance: Release Planning, Change Advisory Board (CAB), Deployment Approval, UAT, Incident and Ticket Management, Root-Cause Analysis, Product Risk Management, Non-Functional Requirements, Data Privacy, Regulatory and Audit Compliance

Discovery & Data: Story Mapping, Jobs-to-be-Done, Personas, Discovery Workshops, Usability Reviews, Product Analytics, Adoption and Engagement Metrics, A/B Testing, Data-Informed Decision Making

TOOLS & TECHNOLOGIES

Backlog & Delivery: JIRA, Confluence, Azure DevOps (ADO) Boards and Dashboards, BigPicture, Productboard, IdeaBoardz, ServiceNow

Design & Collaboration: Figma, Balsamiq, Miro, Lucidchart, Visio, Draw.io, SharePoint, Slack, Microsoft Teams, Excel (advanced), PowerPoint (advanced)

Analytics & Engineering: Google Analytics, Heap Analytics, Adobe Analytics, SAP BusinessObjects BI, SQL / PL-SQL, Splunk, GitHub, Postman, Swagger UI, Kloudville, Activiti BPM, Alfresco DMS, PoolParty

AI & Automation Tooling: Claude, Claude Code (CLI), ChatGPT, Cursor, Ollama with local open-weight models (Llama, Mistral, Gemma, Qwen), Base44, Make, Zapier, Playwright

PROFESSIONAL EXPERIENCE

Senior Product Owner — Infosys Limited (Client: T-Mobile) | Houston, TX, USA | Jan 2024 – Mar 2026

- Owned product vision, roadmap and backlog for a mobile loyalty and rewards platform serving 10M+ customers across iOS, Android and web.
- Translated requirements from product management and business stakeholders into epics, user stories and technical stories with BDD-style acceptance criteria, clarifying detail with SMEs, architects and testers.
- Facilitated sprint planning, backlog refinement, reviews and retrospectives in Jira, maintaining a groomed, release-ready backlog; managed cross-team dependencies for coordinated, on-time releases.
- Reviewed completed sprint work against agreed Definition of Done, accepting or rejecting deliverables before production.
- Owned Data Subject Request (DSR) compliance delivery and partnered with architecture and security on data-in-transit encryption; maintained product risk management across usability, security and regulatory requirements.
- Represented the product in Change Advisory Board meetings for release readiness, risk assessment and deployment approval, through post-release validation.
- Drove data-informed decisions using engagement and adoption metrics; led migration of digital analytics from Adobe Analytics to a modern data-insights stack.

- Applied AI-assisted discovery and prioritization techniques to backlog analysis, user-feedback synthesis and requirement drafting, improving refinement speed and consistency.

Technical Product Owner — Infosys Limited (Client: Brightspeed) | Houston, TX, USA | Apr 2023 – Dec 2023

- Led migration of legacy Ethernet BSS applications to a catalog-driven architecture on the Kloudville platform, including vendor evaluation and supplier coordination.
- Owned Enterprise Product Catalog design, product modelling and lifecycle governance for enterprise connectivity and fibre solutions.
- Drove Configure-Price-Quote workflows enabling automated quotation, discount governance and feasibility approvals.
- Partnered with Sales, Operations, Architecture and Engineering on Quote-to-Order transformation; improved order-cycle efficiency and reduced manual intervention.

Product Owner — Infosys Limited (Client: T-Mobile) | Houston, TX, USA | May 2022 – Mar 2023

- Owned the product backlog for telecom planning and design applications supporting nationwide network initiatives.
- Led modernization and security-compliance upgrades for business-critical platforms.
- Coordinated release planning, billing integration and post-release production support including incident resolution; single point of contact between business, vendors and engineering.

Product Owner — Tata Consultancy Services (Client: McKinsey & Company) | India & USA | Aug 2015 – May 2022

- Product Owner for enterprise knowledge-management and digital-collaboration platforms used by globally distributed consulting teams.
- Defined product vision, multi-quarter roadmaps and OKRs; owned and prioritized backlogs from user feedback, analytics, regulatory needs and business impact.
- Led discovery workshops, stakeholder interviews and usability reviews, applying story mapping, Jobs-to-be-Done and personas; collaborated with UX/UI on wireframes and prototypes.
- Implemented document-approval workflows and role-based access control within enterprise DMS; led taxonomy and ontology initiatives improving knowledge classification, metadata modelling and search relevance.
- Delivered regulatory enhancements under Customer Data Due Diligence and Recovery (CDDR), ensuring U.S. data-governance and audit compliance.

Innovations Lead / Business Analyst; Project Manager / Business Analyst — Tata Consultancy Services (Client: Vodafone India) | Pune, India | Mar 2011 – Nov 2014

- Led innovation initiatives focused on revenue growth, analytics and customer experience, converting concepts into production-ready digital solutions.
- Managed end-to-end delivery of the Olympus Business Intelligence platform for the CXO community, built on SAP BusinessObjects — recognized as Best Global Initiative across Vodafone.

Earlier Career — Telecom Engineering & Project Management | 2002 – 2011

Siemens Public Communications Networks Ltd (SPCNL), Nokia Siemens Networks, Tech Mahindra, ADA Cellworks, Reliance Infocomm | India. Microwave radio commissioning, mobile network infrastructure rollout (BTS, BSC, transport), and L3 transmission support in a global network operations centre, followed by project management on IT projects.

BUSINESS IMPACT

- 10M+ customer base supported through loyalty and rewards platform enhancements.
- 15–25% improvement in feature adoption and engagement by prioritizing high-value backlog items against OKRs.
- 15–20% faster time-to-market by streamlining backlog readiness and cross-team dependency management.
- Defined and prioritized APIs and integrations across OSS/BSS, loyalty and enterprise platforms; captured and validated non-functional requirements with QA and DevOps.

EDUCATION & CERTIFICATIONS

Bachelor of Engineering — Electronics & Telecommunication: Mumbai University, India

Professional Certificate in AI-Powered Product Design and Management: IIT Madras (in progress)

Certifications: Professional Scrum Product Owner (PSPO I and II) | Certified Scrum Master (CSM) | PRINCE2 Foundation and Practitioner | TCS Product Owner Competency Level 3

Languages: English (Fluent), Hindi (Fluent), Malayalam (Native), Marathi (Intermediate), Tamil (Intermediate)
